

# Online Emergency Platform designed to help save lives!

VIEW CASE STUDY

Project Name  
MediMee

Type of Service  
Mobile Application, Web Application, Wearables

## The Situation

When it comes down to Emergencies, we often see patients dying because of the lack of knowledge pertaining to their medical history.

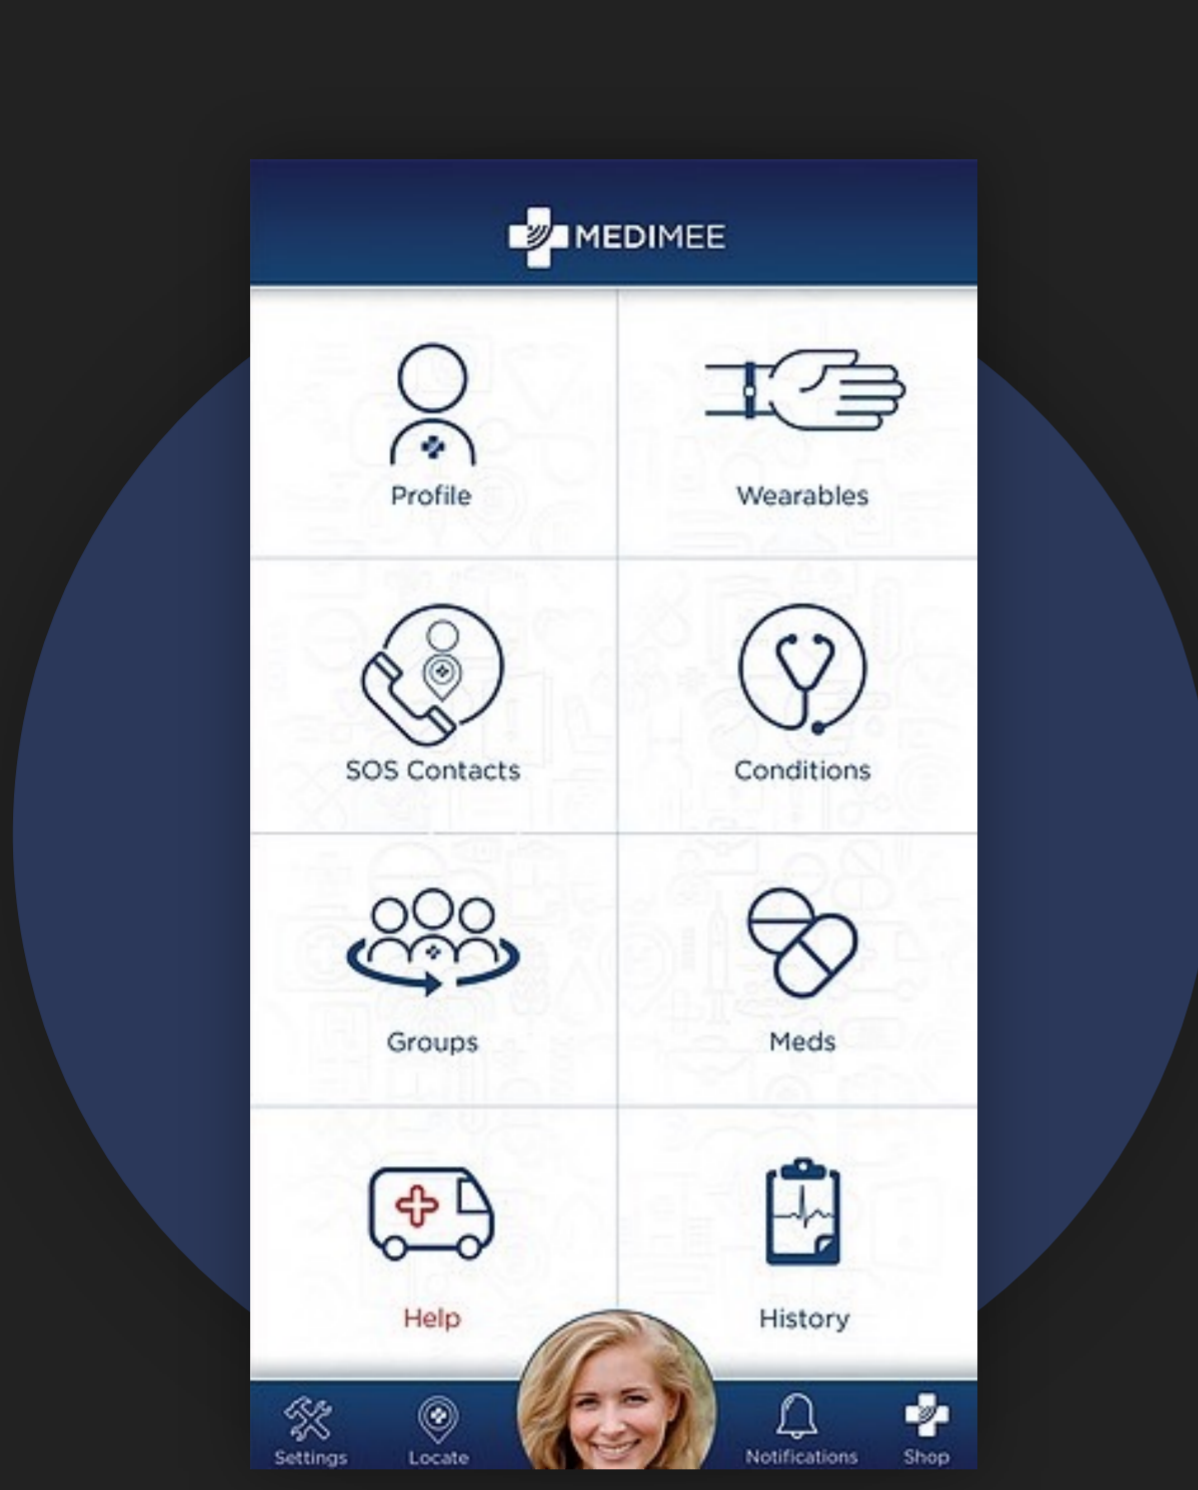

It is important that the first responders have access to the patient's medical history.

Client approached "Travash" with a need to solve this setback as well as providing access to the medical data of patients to doctors or Health care organizations and also providing a user-friendly interface to patients to track doctor appointments & medication alerts.

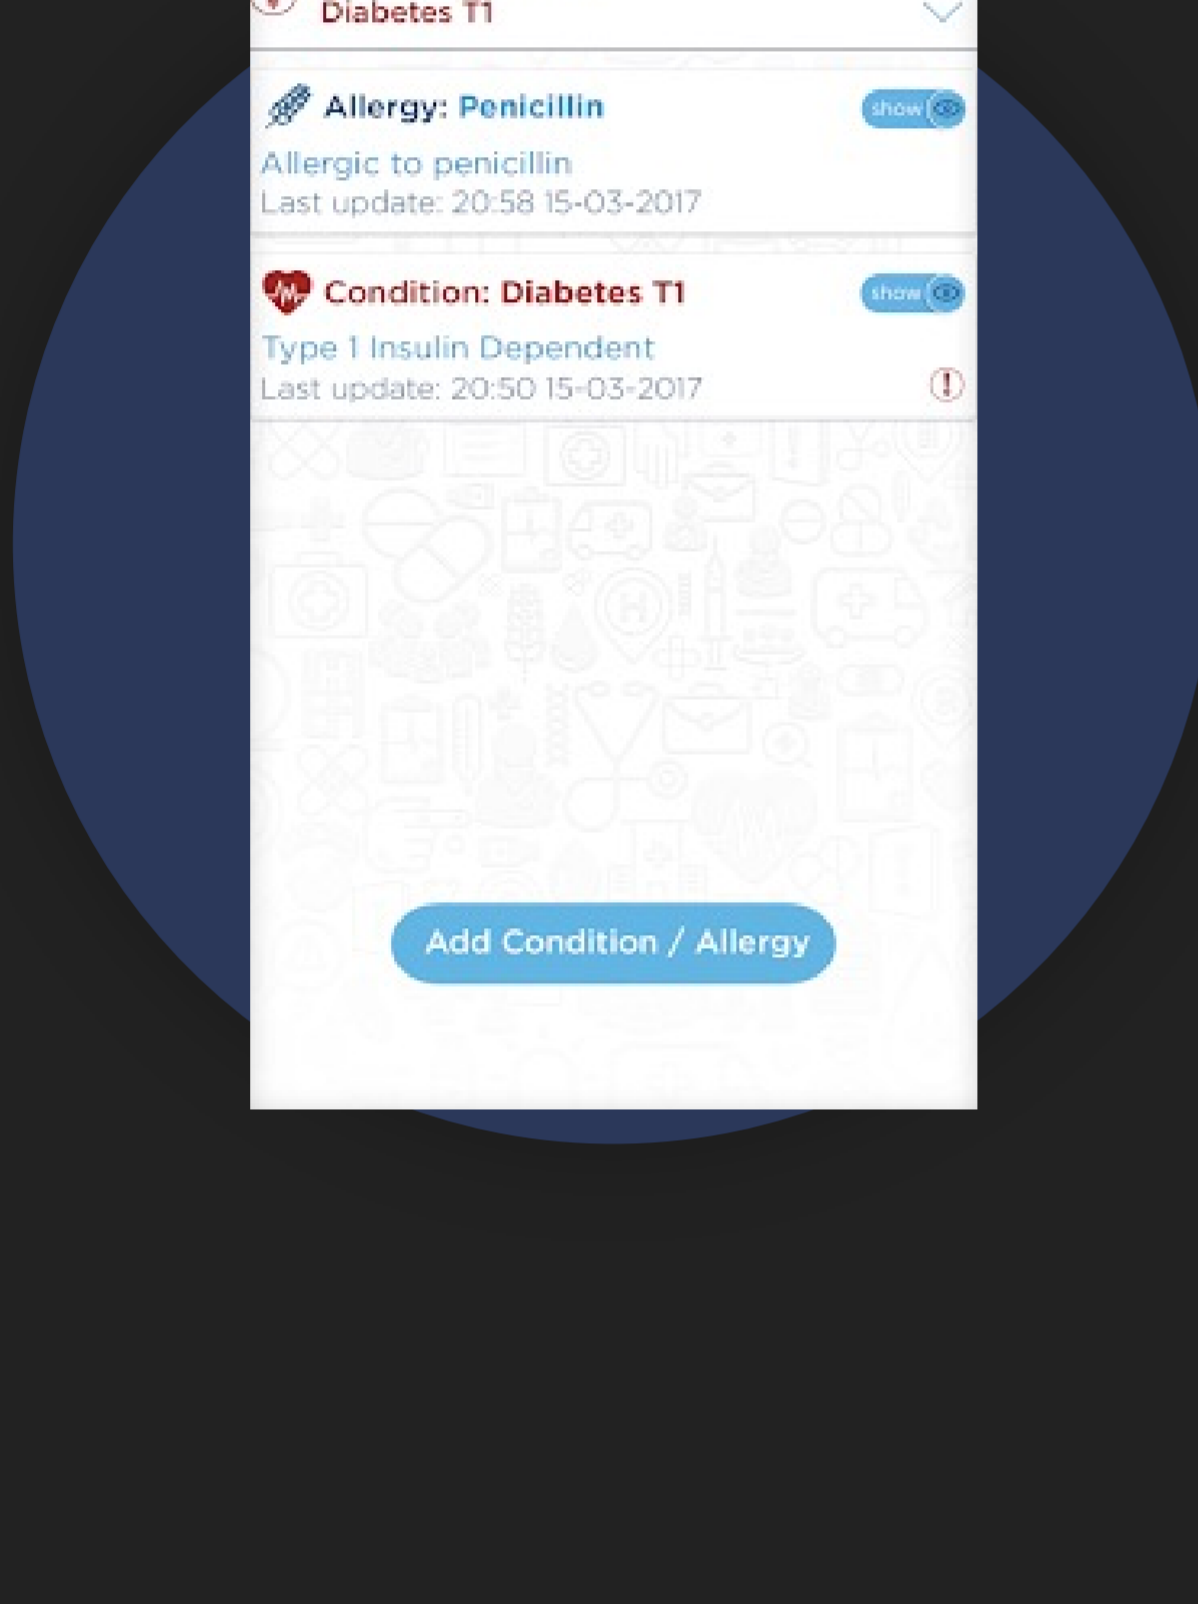

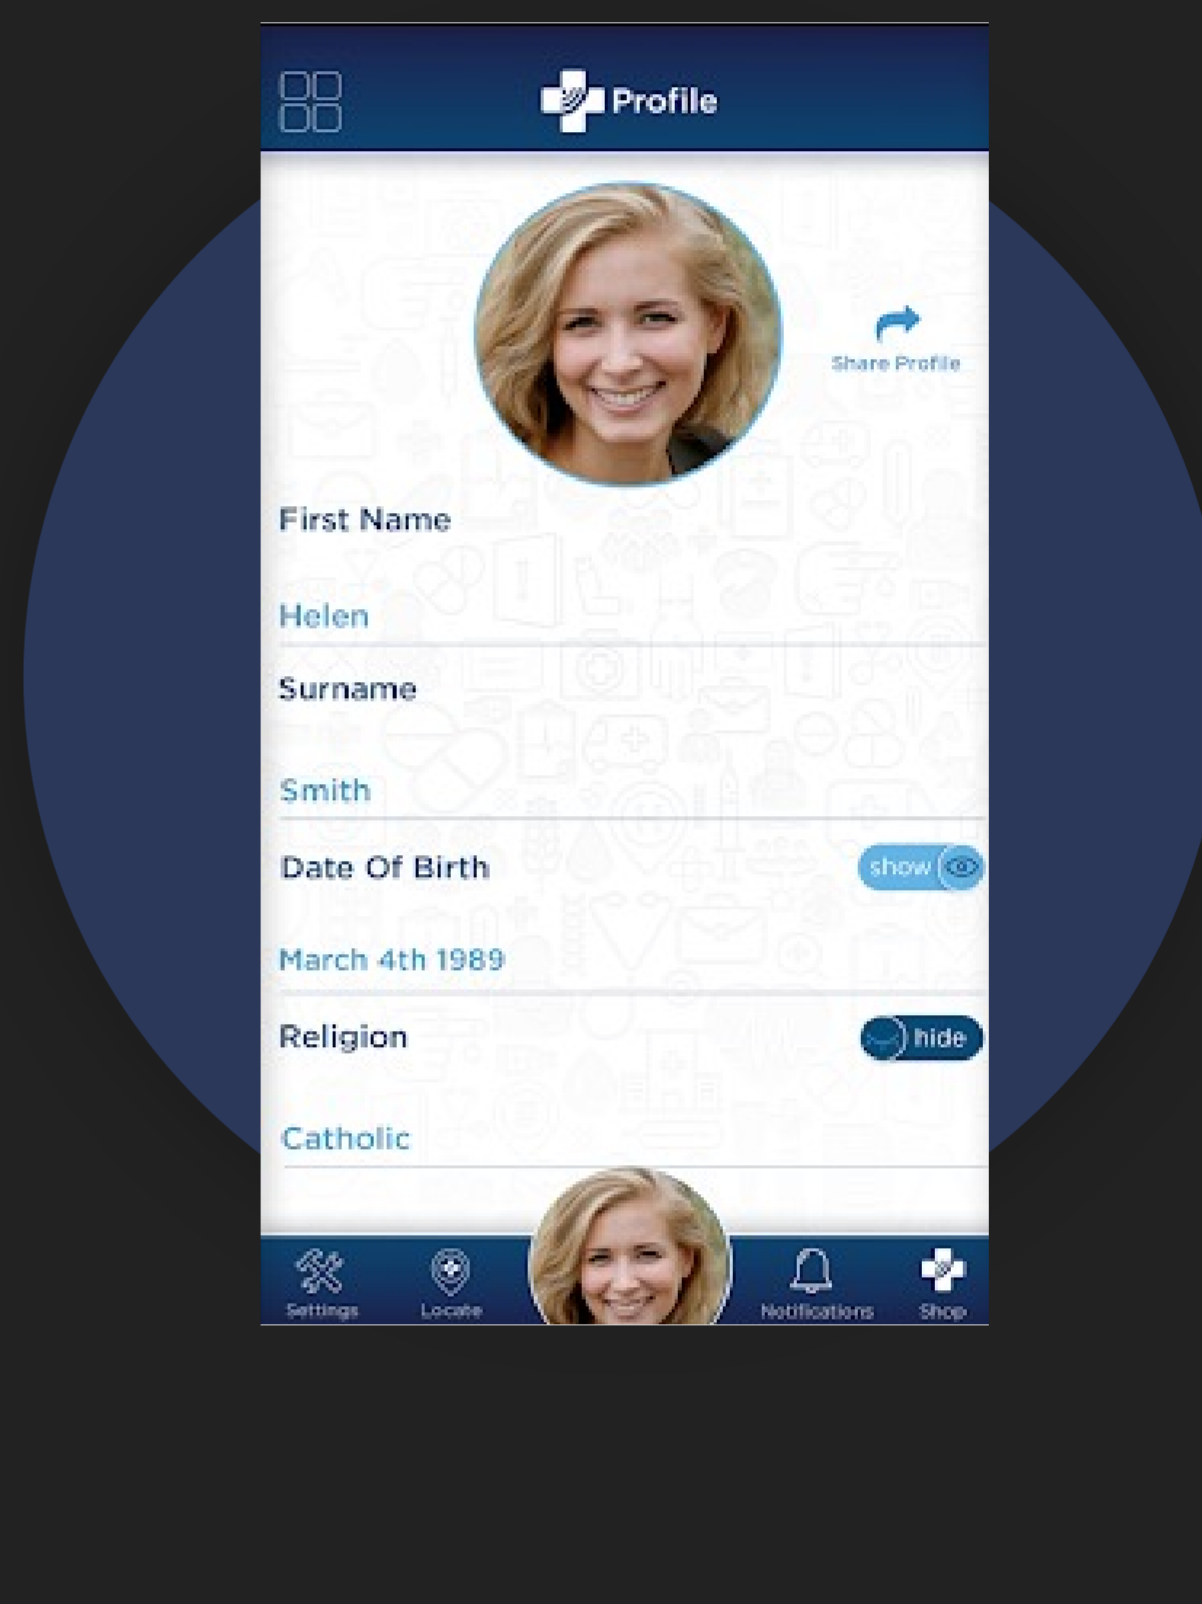

## The Solution

These are solutions we have provided for MediMee.

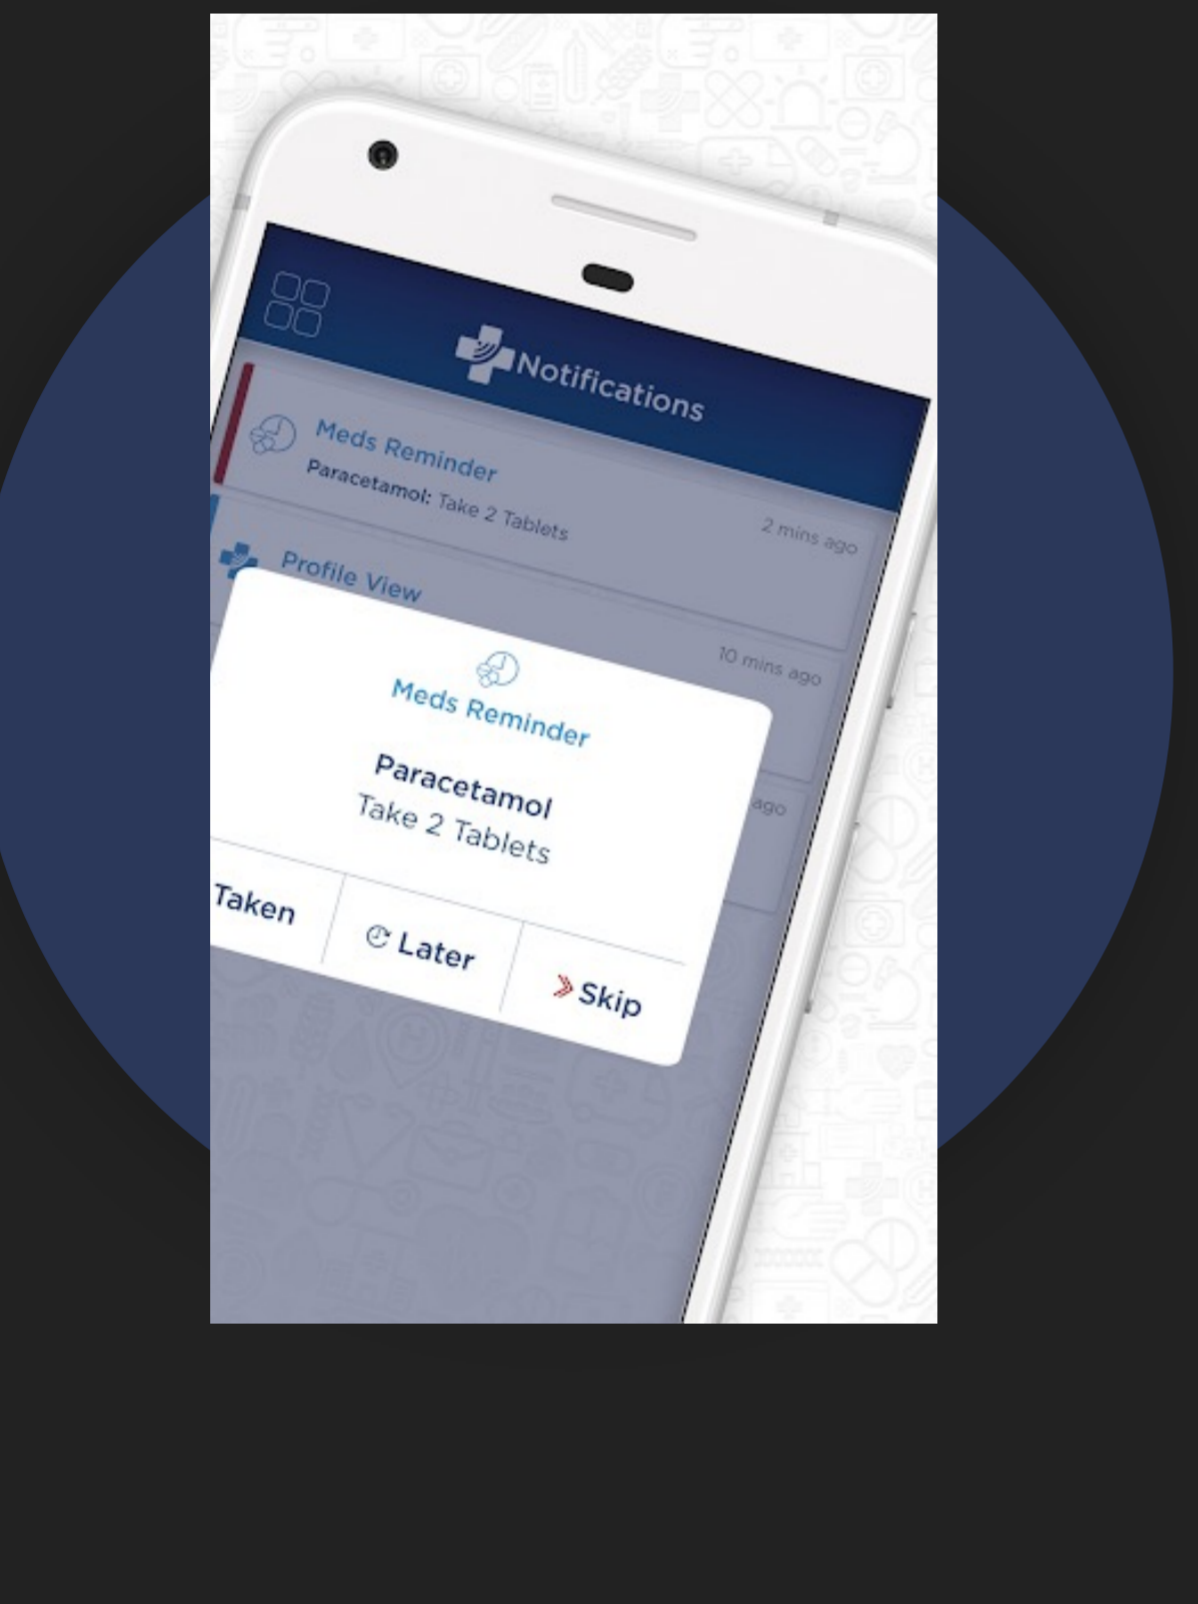

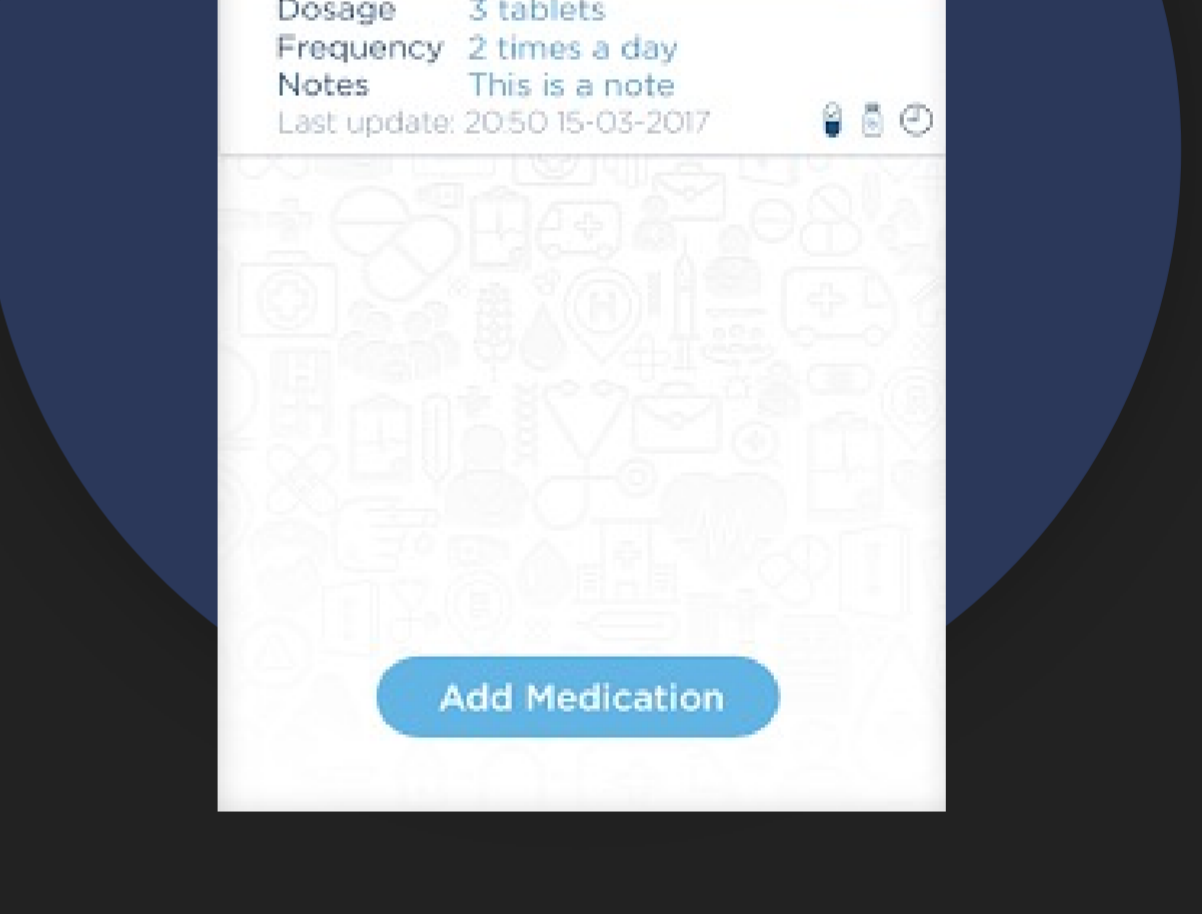

MediMee is an Award Winning Online Emergency Platform designed to help save lives!

MediMee provides an extensive medical profile where you can choose what can be seen

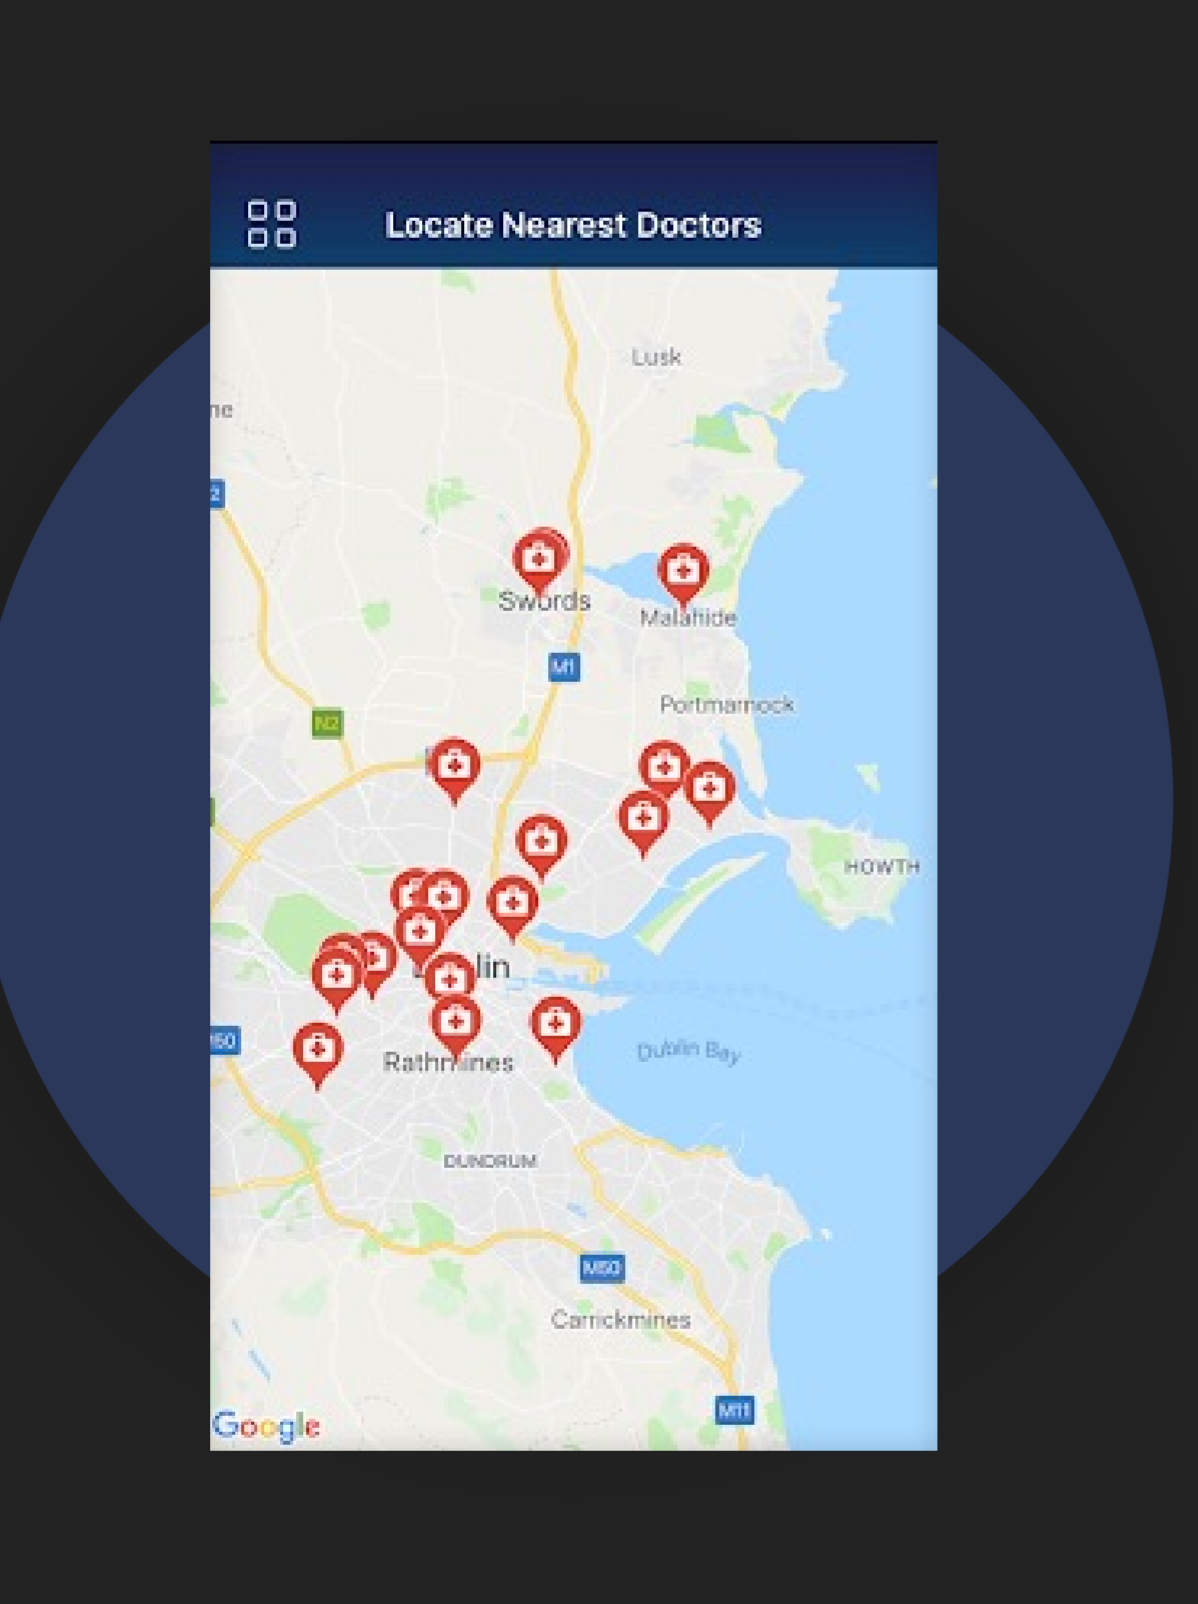

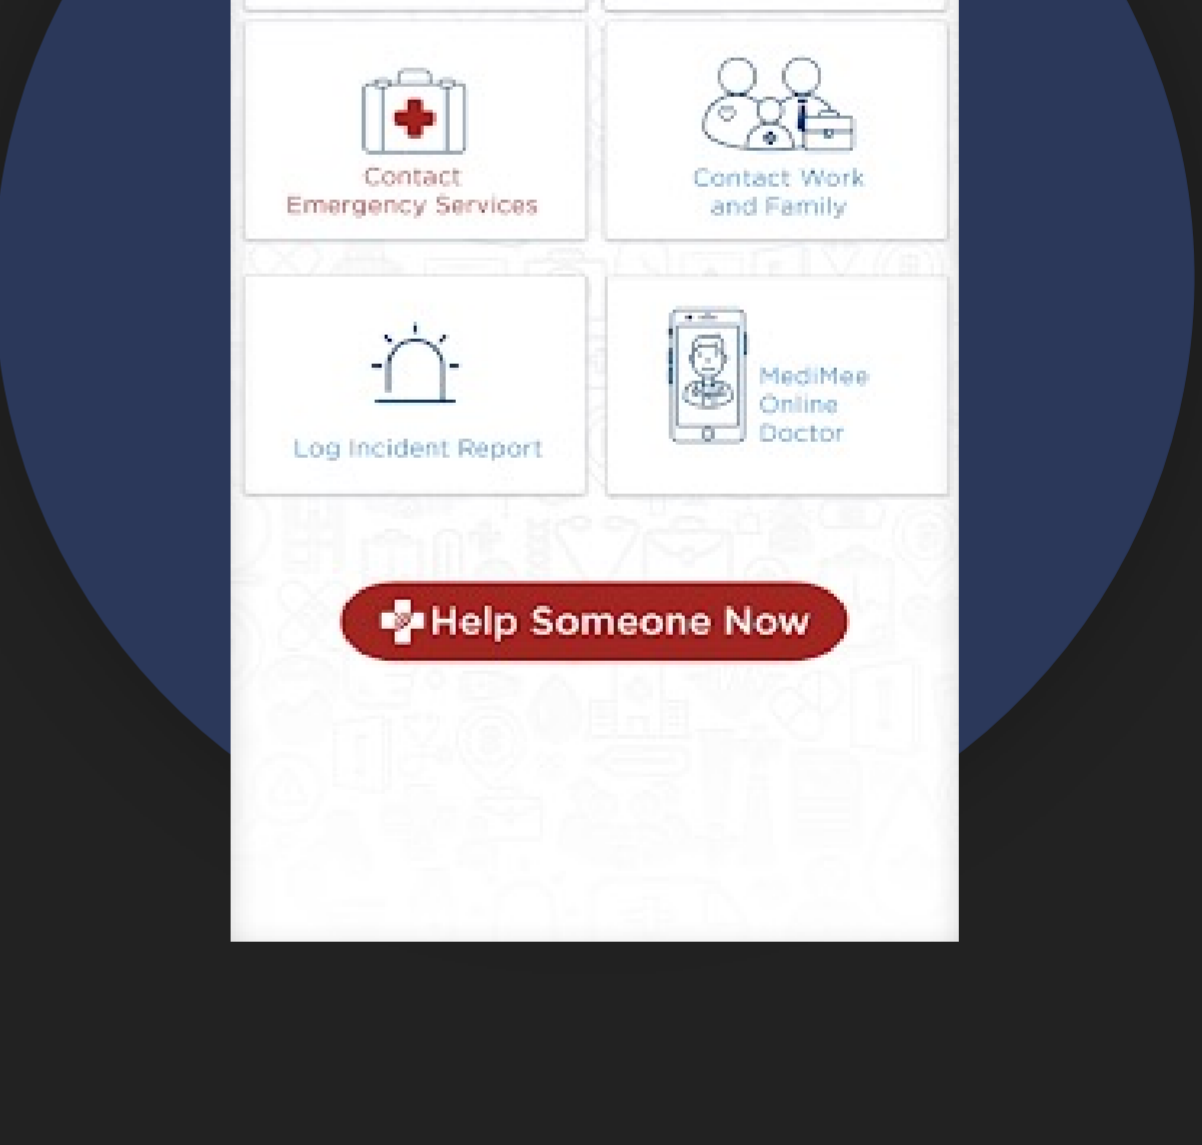

Add any vital conditions or allergies you may have to your profile

MediMee stores all your medication where you can choose what can be seen

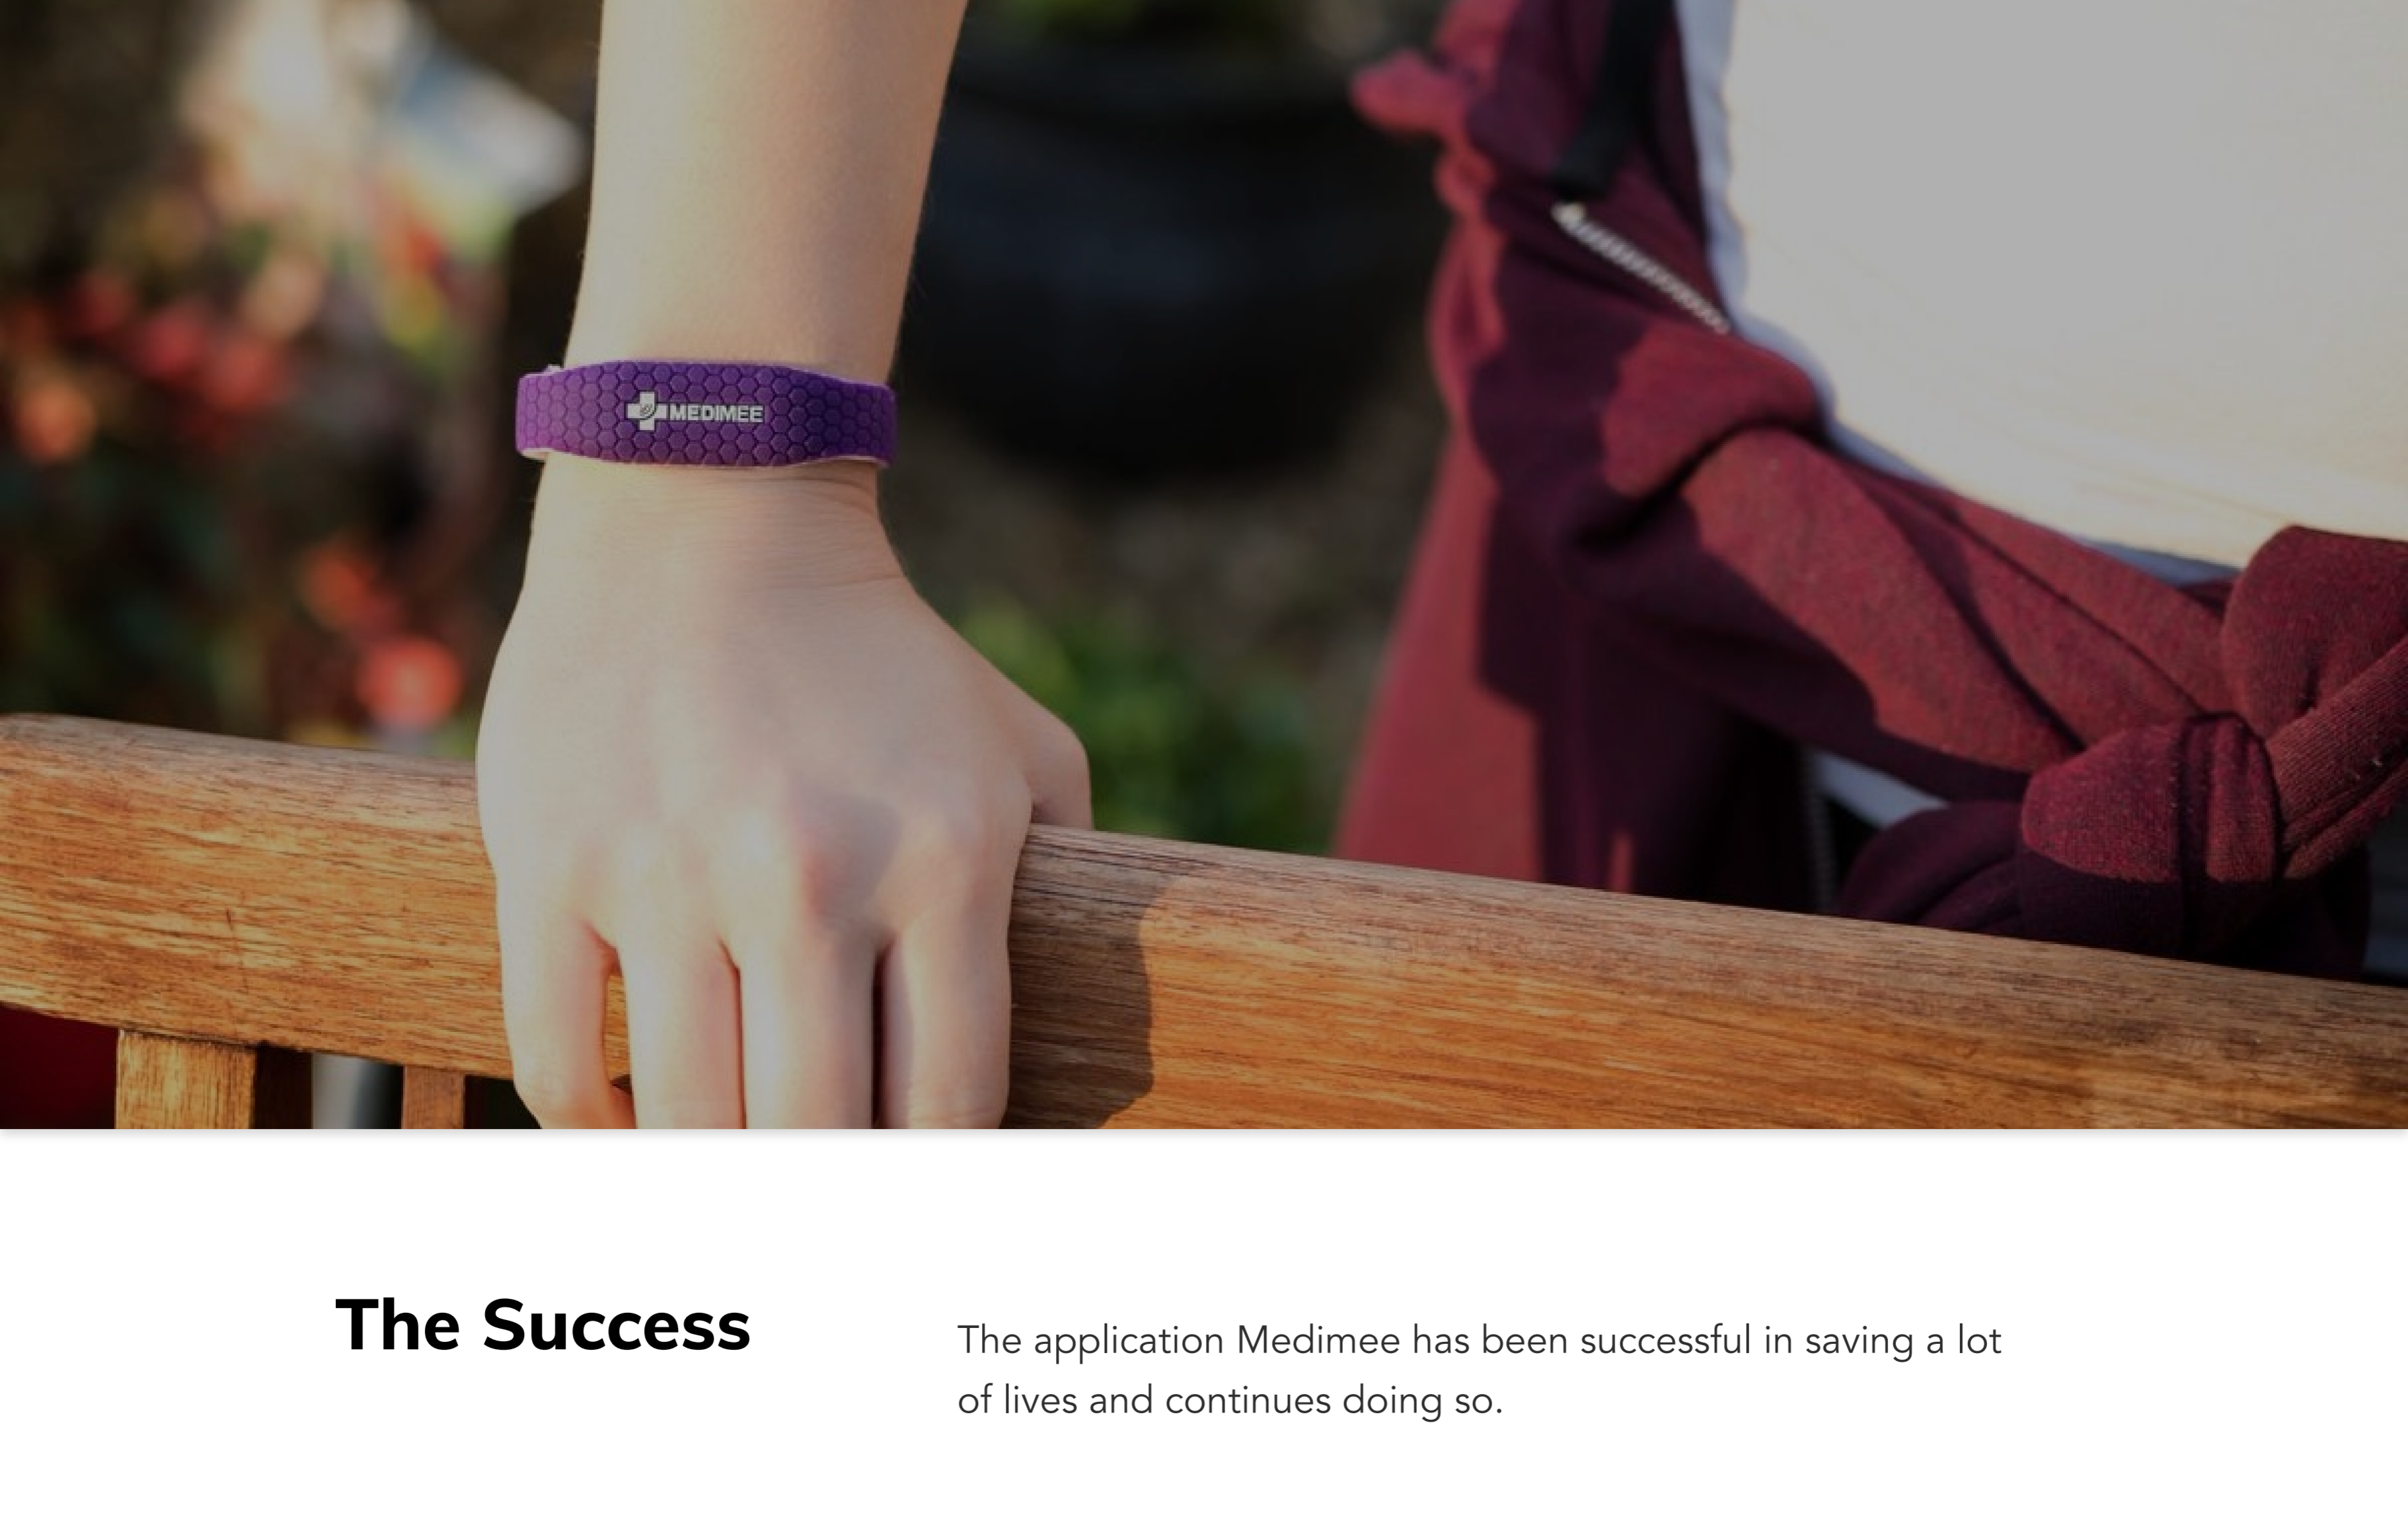

Never forget a medication again with MediMee med reminders

In an emergency MediMee can send your GPS location to any SOS contact you have chosen

Quick and easily locate the nearest Doctors, Pharmacies, Hospital, Dentists or Opticians

Simple tap with an NFC capable device or enter the printed MediMeeID to instantly launch a profile with our smart MediMee products

## The Success

The application MediMee has been successful in saving a lot of lives and continues doing so.
